

## PRODUCT DETAILS

**136F0136****7DP-016852-000021225****VACON® NX\_ Frequency Converter**

The VACON® NX family of air-cooled and liquid-cooled drives is designed for a broad range of demanding industrial applications.

It comprises wall-mounted, enclosed and system drives in the power range 0.55 kW-5.3 MW.

Liquid-cooled variants are well-suited to applications where air quality is critical, space is limited, and highly efficient heat transfer is required.

VACON® NX drives deliver maximum motor control performance and dynamics for both single-shaft machines and drive systems.

Configurable I/O and fieldbuses cater for any connectivity need.

You can customize drive functions to obtain cost savings and deeper machine integration.
