VACON® 20 comes with compactness and programming functionality that makes it one of the most easily adaptable drives available for OEM applications.

The VACON® 20 has a built-in PLC functionality according to IEC 61131-1 which brings cost savings to the user.

For the OEM or machine builder it is easy to change the software logic of the drive to adapt to their own control needs. The VACON® 20 supports a wide variety of fieldbus connections, which enable effective machine integration, eliminating the need for external fieldbus gateways and parallel I/O connections.

With the optional copying module, parameter configurations can be copied into the VACON® 20 during the installation phase with no need for mains power - saving both time and effort.
